

## SAN DIEGO ASSOCIATION OF GEOLOGISTS

[www.sandiegogeologists.org](http://www.sandiegogeologists.org)

### CALL FOR PAPERS - SDAG 2015 FIELD TRIP

#### “Western Salton Trough Regional Tectonics, Coyote Mountains and Vicinity”

November 6 - 8, 2015

On this field trip we will explore the complex geologic history of the western Salton Trough as expressed in the Coyote Mountains north of Ocotillo. Paleozoic miogeoclinal metamorphic rocks, coarse-grained Mesozoic intrusive rocks, and Cenozoic sedimentary rocks and conglomerates have been deformed by major faulting. The complex structure of the area challenges geologic interpretation. We seek to examine revealing outcrops that help to illustrate the stratigraphy, structure, and regional geology in this area. We will also consider the mineral potential, tectonics of the region, and resulting landforms.

SDAG seeks new manuscripts based on original work relating to regional geology and tectonics, from the western Salton Trough in San Diego and Imperial counties, and Baja California in the broad fields of regional geology, sedimentology, soil, tectonics, paleontology, engineering geology, petrology, paleoclimatology, landslides, and related fields. We also invite authors to submit articles on the history of the region as it relates to geology and geomorphology.

Deadline for Abstracts: Friday, May 29, 2015

Please submit the following information along with abstracts:

- Title
- Author(s) and affiliation
- Address, email, and telephone numbers for the author(s)

Submit abstract by e-mail to Randy Wagner: [randallwagner@live.com](mailto:randallwagner@live.com) (760) 877-3490
