

# SAN DIEGO ASSOCIATION OF GEOLOGISTS

NOVEMBER MEETING

THURSDAY, November 17, 1983

Speaker: Roy J. Shlemon, Ph.D., Geological and Environmental  
Consultant

Topic: Late Quaternary Geology of the Camp Pendleton -  
San Onofre Coastal Area

Roy Shlemon, Soil Stratigrapher par excellence, will present the details of some of his work done in the San Onofre-Camp Pendleton area. Much of this work was performed in conjunction with and reviewed by such entities as the NRC and Southern California Edison. Roy will speak on the neotectonics of the area, soil stratigraphic and radiometric age dating, rates of soil development and its relationship to lost movement on the Christianitos Fault System.

Dr. Shlemon is a well known soil stratigrapher who has performed his magic, on a consulting basis, for many of the major geotechnical and geologic firms and review agencies in the west. His experience is, in fact, world-wide, with having visited many of the best and worst places in the world in the name of SCIENCE. To top it all off, Roy is a nice guy and a heck of a speaker. We expect an interesting and educational evening.

Where: Top of the Arc, Travelodge, 1960 Harbor Drive, San Diego

When: 6:00 Cocktails 7:00 Dinner 8:00 Speaker

Menu: Buffet Style with Chicken in Wine Sauce, Fish, Rice  
Veggies, Salads, Beverage and Dessert

Cost: \$12.00

✓ Make reservations by noon Tuesday (November 15) with secretary (Sarah, Linda or Alyssa: choice of one) at San Diego Soils Engineering, 268-8266.

## ANNOUNCEMENT

November is the month for nominating officers for SDAG 1984. If you don't nominate or vote, you can't complain.

Sons of Antares are planning a winter Death Valley trip. Contact Mickey, Goofy or Donald for information. More to come on this exciting venture.

Total membership is about 120. Why don't we all get together sometime?
