## NEWS & NOTES

1) This will be the last month you will receive this notice unless you are a dues paying member for this year. If you have an application attached to your announcement, you are not current.

2) Our thanks and appreciation to Dave Skelly for his very fine discourse on beach erosion processes in Southern California last month. Dave was kind enough to provide a talk when our programmed speaker was called out of state. Dave obtained his Master of Science degree from Scripps Institute of Oceanography after obtaining a B.A. in Engineering Sciences from U.C.S.D. He has performed and cooperated in research on sedimentation processes and control for harbors and lagoons, as well as wave erosion control methods.

3) Our speaker this month, Mr. Leonard Krazynski, has experience including technical, administrative and financial responsibility for the geotechnical aspects of investigation, analysis, design and construction of a wide variety of projects. These projects include commercial buildings, industrial plants, schools, and residential development. Other projects include highways, airports, bridges, high-rise buildings, earth dams, nuclear and fossil fuel power plants. Additionally he has participated in petroleum and petrochemical projects. He has work experience in Africa, Europe, Asia, and the Middle East, as well as the United States.

Mr. Krazynski assisted the Government of Sudan in identification of the cause and responsibility for severe damage to two large sugar factories by volume changes in expansive foundation soil. Proceedings before an International Tribunal are expected.

4) **JOB OPPORTUNITY:** Ninyo & Moore, Geotechnical Consultants, San Diego, is actively looking for experienced geotechnical engineers and geologists with solid technical background. Excellent benefits including major medical and dental insurance for the employee and dependents. Submit resumes in confidence to: Ninyo & Moore, 10225 Barnes Canyon Road, A-112, San Diego, California 92121, Attention: Mr. Avram Ninyo
