MEETING NOTICE WEDNESDAY SEPTEMBER 21, 1988

SPEAKER: Mr. John Peterson, San Diego County Hydrogeologist
TOPIC: "Update: San Diego County Groundwater Regulations and Research"
Many changes have been made to the San Diego County Groundwater Policy. This Policy, which was revised last year, will be discussed and explained. In addition, a number of conclusions from the Lee Valley Groundwater Investigation and groundwater monitoring program will be described. The County is also investigating the possibility of additional control on the development of new wells on existing lots. Many lots, which were approved for imported water, are having wells constructed. This could adversely impact the local groundwater system.
